## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 and 10-16, drawn to an apparatus for the printing of functional toners on a flat glass plate.

Group II, claim(s) 9, drawn to a method for producing charged areas on an electrostatic printing plate.

Group III, claim(s) 17-21, drawn to an apparatus for the production of color for black matrices on a flat plate.

Group IV, claim(s) 22, drawn to an apparatus for the production of phosphor patterned glass plates.

The inventions listed as Groups I, II, III, and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of the invention of Group I is a means for filling a mechanical gap between an electrostatic printing plate and a glass plate with a clear toner diluent. The special technical feature of the invention of Group II is biasing a developing unit electrode to approximately 100 volts more than an image plate voltage in background areas. The special technical feature of the invention of Group III is a color filter plate with an electrical conductive coating and color mosaic pattern. The special technical feature of the invention of Group IV is a glass plate patterned with metallic, conductive materials on its inside surface. Since none of the inventions of Groups I, II, III, and IV share a common special technical feature, unity of invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
